

Government ICT Strategy and Action Plan

Mike Smith
Manager AoG ICT Strategy Planning and
Investment

Open Government Partnership
Stakeholder Advisory Group Introductory Briefing
19 August 2015

New Zealand Government

ICT Functional Leadership

Functional Leadership is aimed at **securing economies or efficiencies** across departments, **improving services or service delivery**, **developing expertise and capability** across the Public Service, and **ensuring business continuity**

We work differently to transcend agency boundaries and deliver smarter, customer-centred services

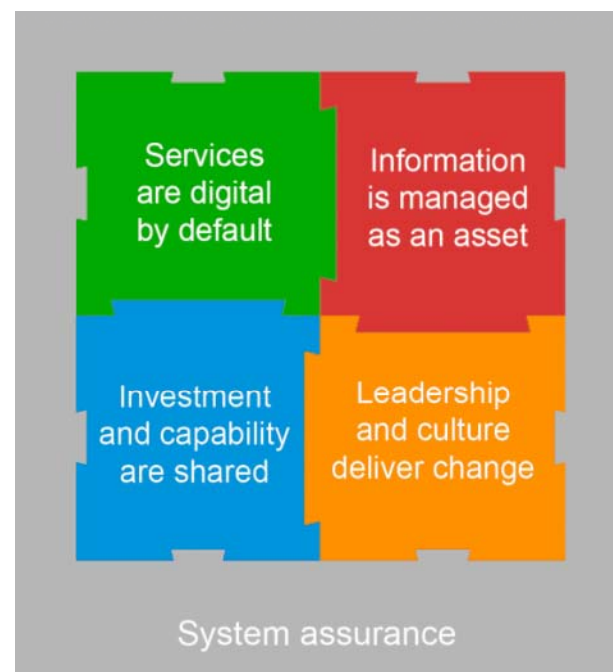

Environment in 2012

- Better Public Services – including Results 9 and 10
- Business Transformation Programmes
- Information Management
- Security and Privacy

Government ICT Strategy and Action Plan

June 2013 vision:

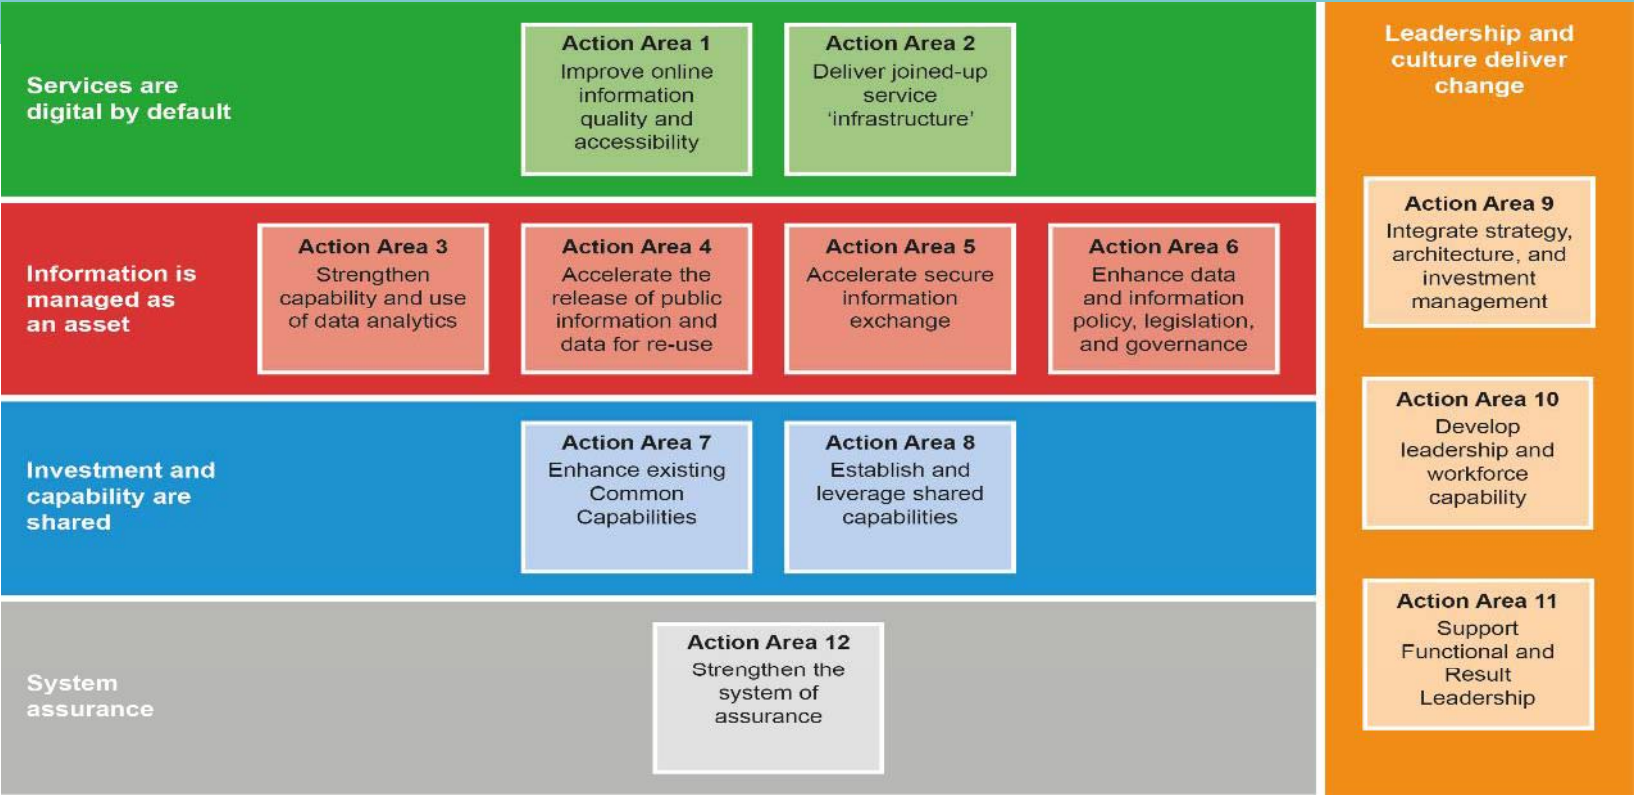

Unlocking the value of government information and harnessing technology to deliver better, trusted public services

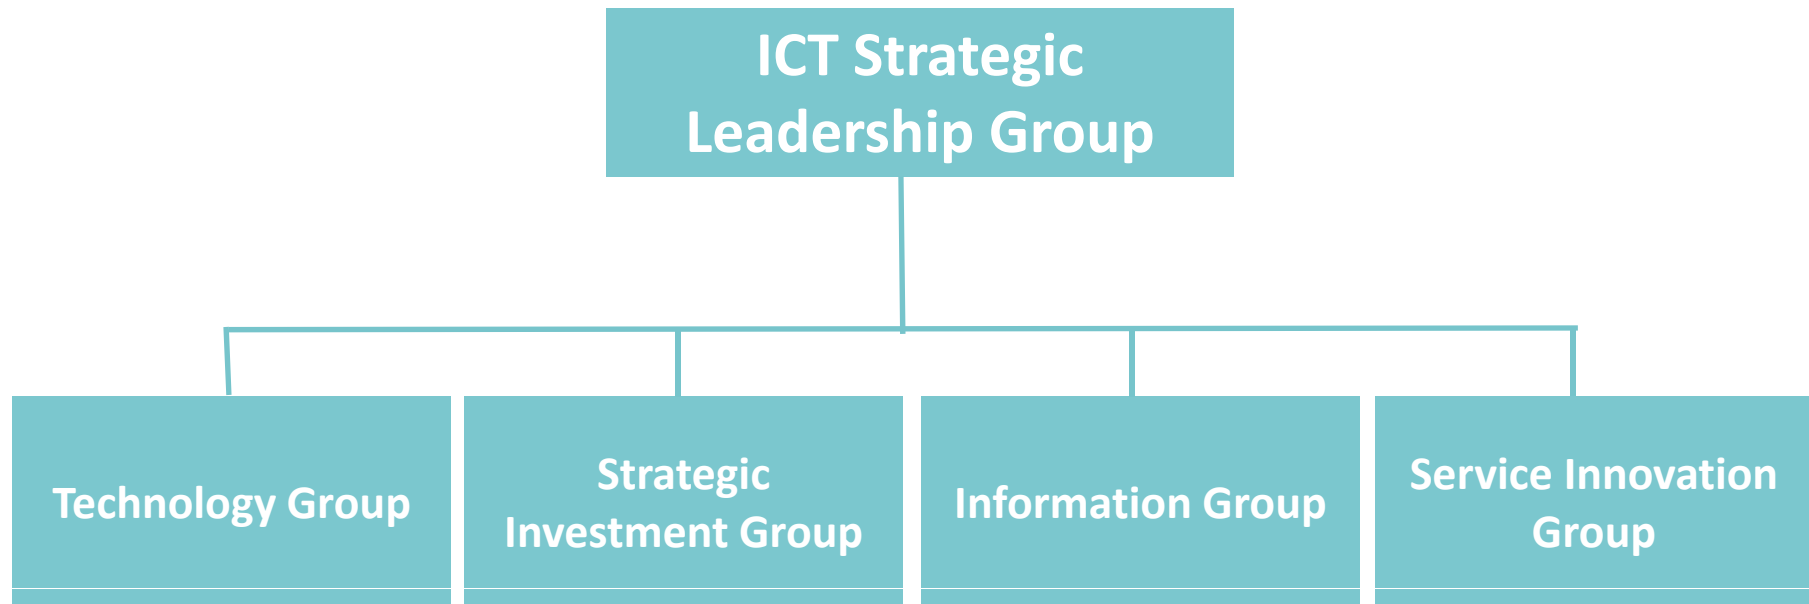

Achievements to date

- The delivery of two cornerstones of future citizen-centric service delivery, RealMe and Govt.nz
- Establishing the role of Government Chief Privacy Officer
- Setting up the system-wide ICT Assurance function
- Issuing cloud computing guidance
- Open Government Information and Data
- Nearly \$70 million a year of cost-savings through Common Capabilities

Updating the ICT Action Plan

Partnership Framework

ICT Strategy

- Cabinet directed a review of the four-year Government ICT Strategy at the mid-point, which is underway now

Relationship to OGP principles

- Transparency
- Participation
- Accountability
- Technology and Innovation

Summary

- ICT covers information and technology
- ICT enables better service delivery
- ICT functional leadership supports an agency business-led approach
- The Government ICT Strategy and Action Plan responds to the system opportunities presented by information and technology
